Interior & Entertainment:
Standard 9 Passengers Configuration, Double Club Seating Arrangement: A left-hand refreshment center featuring an insulated carafe, ice container, trash container, chilled wine bottle storage and customizable storage inserts. Eight fully-adjustable, pedal-mounted passenger seats each with an extendable headrest and fold-down armrest. All passenger seats adjust fore and aft, track laterally into the aisle for additional space, recline and swivel 180- degrees. Each seat is
equipped with a seat belt, a shoulder harness strap with inertia reel, and an over-water life vest stored under the seat. Four fold-out tables with ample work area are included. Side ledges have multipurpose areas for cups and personal electronic devices. An adjustable reading light at each seat position. Four individual Universal 115V AC outlets. A private lavatory compartment with side facing flushing recirculating chemical toilet that is belted for an additional passenger seat. A relief tube, air, light and oxygen outlet are also included. Four low-level pyramid cabinets located on the front right side, center right and left sides (between club arrangements) and on the rear right side. Direct Lighting: General LED lighting, entrance door step and emergency exit lights are located in the passenger cabin. The master switch panel is mounted on the refreshment center. Indirect Lighting: Accent lighting is located in the dropped aisle. Emergency Lighting: Emergency Exit Lighting (in the cabin and over the wing) runs via the Emergency Lighting Battery Pack in case of a power interruption. In-Flight Wi-Fi Connectivity: The system offers wireless internet access for multiple users in the aircraft cabin and cockpit and is compatible with IEEE 802.11 wireless-equipped personal devices such as laptops, tablets, and handheld devices. Interior Storage: The main baggage compartment is located in the aft cabin area. This area is heated and pressurized.

**Exterior:**
Overall Matterhorn White, provided with distinctive exterior styling featuring polyurethane paint in a variety of colours. Exterior Storage: Two exterior compartments located in the wing nacelles offer external storage. These areas are unheated and unpressurized.
